

Carbon Overland

A TRIBUTE TO FREEDOM, CURIOSITY AND EXPLORING

With Carbon Overland it's no longer the rollator that sets the limits

- Durable pneumatic all-terrain tires for superb suspension
- Rigid front forks and sealed bearings for any weather and terrain
- Tough yet light weight at 6.7 kg - for easy lifting in your vehicle
- Carbon fiber frame - 5 x stronger than steel
- Gunmetal aircraft grade aluminum for strength and lightness
- Fully assembled and ready to explore at arrival

DEFENDER GREEN

About us

We are a Copenhagen based team that is transforming the global rollator market with rollators that represent more advanced engineering, mindful design, style and personalization. We produce high-end rollators and our Carbon Ultralight rollator is not only the most stylish outdoor rollator, it is the lightest in the world with only 4.8kg. Naturally, it is CE certified and Tüv tested.

The world has taken notice of our work. Since 2017, byACRE has earned four of the world's most prestigious awards in design and innovation, including the 2019 RedDot Design Award. "by ACRE" is our quality seal. It's rooted in the words 'Active' and 'Re-Habitare' – the Latin word for Back to Life, or back to normal.
